

Muhammad Qasim Akram

Full Stack Developer | React & Node.js

Bahawalpur, Pakistan | +92 312 6442266 | qasimakram46@hotmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer and CS student with 3 production-deployed applications across Azure, Vercel, and Railway. Experienced in software development using React.js, Node.js, Express.js, REST APIs, MongoDB, and JWT authentication. Delivered AI-integrated and e-commerce web applications with CI/CD pipelines, cloud deployment, and code review practices.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Vite, React Router v6, Context API, useReducer, CSS Modules

Backend: Node.js, Express.js, REST APIs, JWT Auth, bcrypt, Sequelize ORM

Database: MongoDB Atlas, MySQL, SQLite **Cloud & DevOps:** Azure App Service, Vercel, Railway, GitHub Actions (CI/CD), Netlify **Other:** Git, Python, NumPy, Pandas, Machine Learning, C++

PROJECTS

DevChat – AI Developer Assistant | [Live](#) | [GitHub](#) 2026

React 19, Node.js, Express.js, MongoDB Atlas, JWT, Groq LLaMA 3.3-70B, Vercel, Railway

- Deployed 3-service cloud architecture (Vercel + Railway + MongoDB Atlas) achieving sub-300ms API response times; built per-user session persistence with auto-generated titles and markdown rendering with syntax-highlighted code blocks across 5+ supported languages.
- Integrated Groq LLaMA 3.3-70B via server-side API proxying, reducing client-side API exposure to zero; built 3 quick-action chips (Debug, Explain, Optimize) and collapsible sidebar supporting unlimited session history.
- Conducted iterative code review and refactoring cycles; managed state with Context API, useReducer, 3 custom hooks, and full JWT/bcrypt auth — cutting unauthenticated route access to zero.

yourOwn – Full Stack E-Commerce Platform | [Live](#) | [GitHub](#) 2026

React 19, Node.js, Express.js, Sequelize, SQLite, JWT, Azure App Service, GitHub Actions

- Deployed production e-commerce platform on Azure App Service with a 14-endpoint REST API across 4 modules (products, cart, orders, payment); implemented cart management, order tracking, and 3 delivery options through software development best practices.
- Configured end-to-end CI/CD pipeline with GitHub Actions — reduced deployment time to under 2 minutes per push with zero manual steps, replacing a previously manual process.
- Implemented JWT authentication with bcryptjs password hashing, 7-day token expiry, and protected routes; performed code review on all auth flows before merging, achieving zero known security regressions.

Minimal Analysis – AI Stock Prediction Web App | [GitHub](#) 2025

Vanilla JS, HTML, CSS, Node.js, Express.js, Groq LLaMA API

- Built full-stack AI stock analysis tool using Groq LLaMA API to generate real-time market insights with average response time under 2 seconds; Node.js/Express backend handles secure API proxying, fully documented on GitHub with README covering setup, architecture, and usage.

EDUCATION

Islamia University of Bahawalpur — BS Computer Science (6th of 8 Semesters) Sep 2023 – Sep 2027

Relevant Coursework: Web Engineering, DSA, DBMS, OOP, Theory of Automata, Parallel Computing, Compiler Construction, Computer Vision

CERTIFICATIONS

Advanced MySQL Topics — Meta | [Verify](#) Sep 2025

Supervised Machine Learning: Regression & Classification — Stanford | [Verify](#) Dec 2025

Python for Data Science, AI & Development — IBM | [Verify](#) Oct 2025

AI For Everyone — DeepLearning.AI | [Verify](#) Jul 2025
