

Muhammad Qasim Akram

Full Stack Developer | React & Node.js

Bahawalpur, Pakistan | +92 312 6442266 | gasimakram46@hotmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Full Stack Developer and CS student with 3 deployed production applications on Azure, Vercel, and Railway. Built **DevChat** — a full-stack AI chat app with MongoDB Atlas, JWT auth, and Groq LLaMA 3.3-70B — and **yourOwn** — a fully deployed e-commerce platform with React, Node.js, and Azure App Service CI/CD. Strong foundation in React.js, Node.js, REST APIs, MongoDB, and AI integration.

TECHNICAL SKILLS

Frontend: React.js • JavaScript (ES6+) • HTML5 • CSS3 • Vite • React Router v6 • Context API • useReducer • CSS Modules

Backend: Node.js • Express.js • REST APIs • JWT Auth • bcrypt • Sequelize ORM

Database: MongoDB Atlas • MySQL • SQLite

Cloud & DevOps: Microsoft Azure App Service • Vercel • Railway • GitHub Actions (CI/CD) • Netlify

Other: Git • GitHub • Python • NumPy • Pandas • Machine Learning • C++

PROJECTS

DevChat – AI Developer Assistant | Personal Project | 2026 | [Live Demo](#) | [GitHub](#)

Tech: React 19, Node.js, Express.js, MongoDB Atlas, JWT, bcrypt, Groq LLaMA 3.3-70B, Vercel, Railway

- Deployed a 3-service cloud architecture (Vercel + Railway + MongoDB Atlas) with per-user chat session persistence, auto-generated session titles, and markdown rendering with syntax-highlighted code blocks.
- Integrated Groq's LLaMA 3.3-70B via server-side API proxying — key never leaves the backend; built quick-action chips (Debug, Explain, Optimize) and a collapsible sidebar with full session history.
- Architected state with Context API + useReducer, custom hooks (useAutoScroll, useFormInput, useLocalStorage), error boundaries, and complete JWT + bcrypt auth with protected routes.

yourOwn – Full Stack E-Commerce Platform | Islamia University of Bahawalpur | 2026 | [Live Demo](#) | [GitHub](#)

Tech: React 19, Node.js, Express.js, Sequelize, SQLite, JWT, bcryptjs, Vite, Azure App Service, GitHub Actions

- Deployed a production e-commerce platform on Microsoft Azure App Service with cart management, order tracking, and delivery options — 14-endpoint REST API covering products, cart, orders, and payment summary.
- Built end-to-end CI/CD pipeline using GitHub Actions — code pushed to main auto-deploys to Azure in under 2 minutes with zero manual steps.
- Implemented JWT authentication with bcryptjs password hashing, protected routes, and 7-day token expiry across signup, login, and session management flows.

Minimal Analysis – AI Stock Prediction Web App | Personal Project | 2025 | [GitHub](#)

Tech: Vanilla JS, HTML, CSS, Node.js, Express.js, Groq LLaMA API

- Built a full-stack AI stock analysis tool integrating Groq's LLaMA model to generate real-time market insights based on user-entered stock data.
- Designed a minimal dark-themed responsive UI with a Node.js/Express backend handling API proxying to Groq's inference endpoint; fully documented on GitHub.

EDUCATION

Islamia University of Bahawalpur — BS Computer Science | Sep 2023 – Sep 2027 (6th of 8 Semesters)

- Relevant Coursework: Web Engineering, DSA, DBMS, OOP, Theory of Automata, Parallel Computing, Compiler Construction, Computer Vision

CERTIFICATIONS

- Advanced MySQL Topics — Meta | Sep 2025 | [Verify](#)
- Supervised Machine Learning: Regression & Classification — Stanford University / DeepLearning.AI | Dec 2025 | [Verify](#)
- Python for Data Science, AI & Development — IBM | Oct 2025 | [Verify](#)
- AI For Everyone — DeepLearning.AI | Jul 2025 | [Verify](#)
